PERSONAL PROJECTS

Car Loan Management System

- Built a full-stack web application using **spring Boot(backend)** and **React.js(frontend)**.
- Features include EMI calculator with loan application and repayment tracking.
- Integrated **MySQL database** for storing customer and loan details.

Student Management System with Spring Boot

- Manages information for students and courses, including student profiles, course details, and enrolment.
- The project follows **Object-Oriented Programming (OOPS)** principles. The **Collection Framework** is used to handle data structures dynamically.
- **Exception Handling** is implemented throughout the application to manage runtime errors.
- The backend is developed using **Spring Boot**, which simplifies the development process by providing built-in tools for REST API creation, dependency management, and easy integration with databases.
